Enamel mugs

Colourful porcelain

The coloured porcelain collection consists of mugs made of New Bone China porcelain, characterised by its warm shade. These mugs are offered in standard colours - dishwasher resistant. The mug can be all in one colour but you can also have a different colour on the outer wall of the mug and a different colour on the interior. There are 27 standard colours to choose from, including 10 matt colours. The decoration is applied by ceramic decal or by direct ceramic printing. In both cases, the decoration is fixed at a temperature of approximately 800°C and is fully dishwasher safe.

We offer painting of these mugs in any colour according to Pantone, in both glossy and matt versions. The colour is sprayed onto the outside of the cup - the inside remains white. The mugs are then decorated with organic decals with limited resistance to mechanical damage, including dishwashers. This option does not apply only to Geo and Ula mugs.

For white cups, it is possible to add additionally painted edges in any colour you wish.

It is possible to engrave on the mugs in this collection, except for the Geo and Ula models.

White porcelain

The white porcelain collection consists of cups made of Super White porcelain marked SW and Premium porcelain. These are products in a cool shade of white. The mugs made of Premium porcelain are additionally characterised by thin, translucent walls. The decoration is applied by ceramic decal or direct ceramic printing. In both cases, the decoration is fixed at a temperature of approximately 800°C and is fully dishwasher safe.

We offer painting of Super White porcelain mugs in any colour according to Pantone, in both glossy and matt versions. The colour is sprayed on the outside of the cup - the inside remains white. On mugs painted in this way, we apply decoration with an organic decal with limited resistance to mechanical damage, including washing in dishwashers.

Cups

The collection includes cups with saucers made of New Bone China porcelain in a warm white. These cups are offered in 27 standard colours. The cup and saucer can be in the same colour, but it is also possible to have a different cup colour and a different saucer colour. The decoration by ceramic decal is fully dishwasher safe.

We offer painting of the cups (the saucer remains white) in any colour according to Pantone. The cups are then decorated with organic decals with limited resistance to mechanical damage, including dishwasher damage.

Enamel mugs

The traditional enamelled mugs in our range are decorated with a high temperature decal, it guarantees their resistance to dishwasher. An unquestionable advantage of these products is that they can be used on all types of cookers, including induction and open fire. The enamelled cups are suitable for baking in the oven. There is a choice of two sizes in white with a black rim.

PORCELAIN - a type of white, translucent ceramic. We offer products made of different types of porcelain: New Bone China, Super White or Premium.

NEW BONE CHINA NBC PORCELAIN - porcelain with a warm, light cream shade, produced at 1300°C. Available in 27 standard colours.

SUPER WHITE SW PORCELAIN - snow-white porcelain, produced at approximately 1400°C.

PREMIUM PORCELAIN - snow-white porcelain with thin, translucent walls, produced at a temperature of approximately 1400°C.

EU PORCELAIN - porcelain manufactured in Poland.

CERAMICS – (stoneware) a type of non-transparent ceramic with thick walls, produced at a temperature of approximately 1200°C.

STANDARD COLOURS - 27 glaze colours, including 10 matt colours, available on the outer and inner wall of the product. It is possible to combine two different colours on one mug - a different colour on the inside and a different colour on the outside of the mug. The mugs in the standard colours are dishwasher safe. Available decoration methods: ceramic decal, direct print, engraving, chalkboard print, magic print.

PANTONE MATCHED PAINTING - painting the outside of the mug in the colour of your choice according to the Pantone - the inside of the product remains white. Available in glossy and matt finish. The surface painted in the chosen Pantone colour is not scratch-resistant. Painted products can be decorated with organic decal, engraving or magic print.

CERAMIC DECAL - ceramic transfer, i.e. indirect, permanent decoration of ceramics on the principle of a water-based decal printed with ceramic glazes. Ceramic decal is fired at a temperature of approximately 800°C. Such decoration is fully resistant to washing in dishwashers, abrasion, temperature and chemicals. It allows large surfaces to be decorated, not only on the outside of the product, but also on the inside, the bottom or the handle. Ceramic decal enables the transfer of both vector and raster, CMYK - photo graphics onto the ceramic product.

- + dishwasher safe (except for real gold and platinum) - not possible to reproduce all colours according to Pantone
- + both vector and raster CMYK (photo) prints
- + decoration possible: inside of mug, under/over the handle, on the inside, on the bottom
- + large surface of decoration
- + possibility of personalisation
- + real gold / platinum decoration

ORGANIC DECAL - low-temperature transfer, i.e. decal printed with organic paints and applied to the outer surface of the product. This is a way of decorating large ceramic surfaces, guaranteeing pure, vivid colours and full Pantone colour reproduction. Organic decal decoration is not resistant to abrasion or mechanical damage. It is recommended that products decorated with organic decal be washed by hand.

- + pure, vivid colours of the print - not resistant to washing in dishwashers
- + colour reproduction according to Pantone or scratching - hand wash is recommended
- + vector and raster CMYK prints (image) - no interior print possible
- + large decoration area - no shiny gold / platinum
- + can be personalised

PHOTO EXPRESS - digital printing of photos on white products, thanks to which we achieve a very good photographic quality. This overprint is not resistant to abrasion and mechanical damage. Hand washing of products decorated with the photo express method is recommended.

- + pure, vivid colours of the overprint - only available on white products
- + photographic quality of images - not dishwasher or scratch resistant - hand wash recommended
- + large decoration area - no Pantone colour matching
- + possibility of personalisation - no interior print possible
- no real gold / platinum

DIRECT PRINTING - a method of direct decoration of a limited ceramic surface with ceramic glazes. The print is made with ceramic glazes and fired at approximately 800°C. The decoration made with direct printing is fully resistant to washing in mechanical dishwashers, abrasion, temperature and chemicals.

- + dishwasher safe - maximum of 4 decorating colours without tonal gradients
- + low price - limited decoration area
- not possible to reproduce all colours according to Pantone

ENGRAVING (sandblasting) - achieving a 3D effect of decoration by sandblasting the surface of the ceramics. Sandblasting makes it possible to remove the top layer of glaze on a selected area. Sandblasting can be carried out on a white or coloured mug, also on a product painted in a selected Pantone colour.

EDGE PAINTING - additional decoration of the rim of a cup or mug. This decoration is done by hand and is fully resistant to washing in dishwashers, abrasion, temperature and chemicals. It is possible to make the edge of the cup in real gold and platinum (not dishwasher safe).

CHALKBOARD PRINT - the application on ceramics of elements that can be written on with chalk. Available in black or blue. The decoration is fully resistant to dishwasher, abrasion, temperature and chemicals. For chalkboard printed products, chalk is included.

MAGIC PRINT - a special thermo-variable decoration layer of any shape in black. The Magic Print layer disappears when boiling water is poured, revealing the main decoration. Magic Print is not resistant to abrasion. Hand washing of products with magic print decoration is recommended.
